### ZEROW CAMPAIGN MEDIA

With a thickness of 200 Microns, soft & delicate surface, Zerow Campaign Media is a perfect choice for campaigning banners. It is printable with Solvent, EcoSolvent and UV machines.

### ZEROW HOARDING MEDIA

With a thickness of 300 Microns and with no compromise on quality & durability, Zerow Hoarding stands as a seamless choice for hoarding purposes. It is printable with Solvent, EcoSolvent and UV machines.

### ZEROW BLOCK-OUT MEDIA

A white opaque substrate with a thickness of 400 Microns, it comes with great strength, that has no compromise on the quality and printability, it also resists the light passing. Having said that Zerow Block-out Media could be the absolute choice for billboards or even in-store displays. It is printable with Solvent, Ecosolvent and UV machines.

### ZEROW BACKLIT MEDIA

A translucent substrate with a thickness of 300 Microns, having anti-dirt properties and an ability to pass lights well. Zerow Backlit Media would be the complete solution for billboards or light box advertising. It is printable with Solvent, Ecosolvent and UV machines.

### ZEROW PREGUMMED MEDIA

An opaque and adhesive substrate with a thickness of 400 microns, Zerow Pregummed Media is the ultimate step for advertising in flat surfaces like windows, commercial vehicles, or in-door display. It is printable with Solvent, EcoSolvent and UV machines.
